

Tricoci University provides TLC to . . .

Make-a-Wish Foundation

2007 – All TUBC Campuses

During 2007, all six Tricoci University campuses participated in a special effort to sponsor Brittney, a Make-a-Wish recipient that has Lupus, an autoimmune disease. With a goal of raising \$5000, the campuses used a variety of events—cut-a-thons, basket raffles, selling Make-a-Wish stars, as well as creating and selling lip gloss—over a four week period to raise over \$7200 for the Foundation. TUBC students were able to make a girl’s wish come true, and also have a lot of fun in the process!

Brittney's Wish

Eighteen-year-old Brittney (left) is smart and full of energy. She is the youngest of seven siblings and loves spending time with her older sisters. Brittney is not a sports person, but she loves listening to R&B music and watching movies. Her favorite movies include Titanic and Mission Impossible. Brittney was diagnosed with Systemic Lupus Erythematosus, an autoimmune disease.

Brittney wished to go on a shopping spree with her sister because she wanted to pamper herself. Recently, Make-A-Wish sent a limousine to take Brittney and her sister on a day-long shopping spree. Brittney got her makeup done at Bare Escentuals and bought clothes and shoes from stores like Macy's, Gap, Bebe and Champs. After a busy day of shopping, Brittney was treated to lunch at her favorite restaurant, Red Lobster. She had a wonderful time shopping and will always remember the day her wish came true everytime she wears her new clothes.

The Make-A-Wish Foundation® of Illinois
extends a heartfelt thank you to

Tricoci University

for your generosity in making
Brittney's wish come true!
